Clinical Visit Note

Lakeside Orthopedics

Patient: Maria Sato
DOB: 12/14/1962
Date of visit: October 30, 2026
Attending: Dr. Hannah Bianchi

Assessment and plan

Low back pain radiating to the right leg for eight weeks. Symptoms persisted despite six weeks of physical therapy and NSAIDs. Exam shows a positive straight leg raise on the right with a reduced ankle reflex. MRI of the lumbar spine requested to evaluate for disc herniation.
