# Clinical Visit Note

Riverside Family Medicine

Patient: Leah Ramires
DOB: 06/26/1962
Date of visit: October 29, 2026
Attending: Dr. Jonah Ashworth

## Assessment and plan

Follow-up for type 2 diabetes. A1c reviewed and metformin dose increased; foot examination normal. In addition, the patient reports a painful knot in the left upper trapezius. Trigger point injection of the left trapezius performed with lidocaine. The diabetes evaluation was separately identifiable from the injection.
